

When it comes to training, simulation, and the ultimate experience, there's PTS® and then there's everyone else.

With RDT&E (Research, Development, Test & Evaluation) Teams in both USA and Asia and using the best materials and manufacturing processes, PTS® Syndicate is committed to bringing the highest quality and innovative products onto the market to meet and exceed the exacting standards of the most discriminating end user.

PTS® is also a prolific exclusive replica licensor of the latest and greatest products in the tactical weapons market and have an excellent reputation as a trusted licensing partner that works closely with our licensors to extend awareness of their brands into a new market space.

 / OUR LICENSES

PTS® Syndicate is proud to be the worldwide exclusive airsoft license partner for numerous tactical and firearms industry brands. We work tirelessly and diligently to bring the highest quality officially licensed replicas to market to meet the expectations of the most discriminating airsoft enthusiast and to deliver the best possible brand awareness growth and product representation of our licensors' brands."

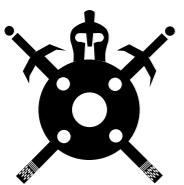

AXTS Weapon Systems is a leading industry innovator of ambidextrous weapon control components for the M4 platform. What sets AXTS above most other companies is their ability to merge revolutionary new functionalities to weapon systems with some of the best design aesthetics in the industry without compromising either form or function. AXTS is best known for their industry-leading Raptor ambidextrous M4 charging handle, their patented A-DAC (Ambidextrous Dual Action Catch) in their precision billet AX556 lower receiver, and the revolutionary adjustable 45/90 degree modular ambidextrous safety called the Talon. All these radically innovative components are also synthesized into their fully ambi MI-T556 precision carbine that's capable of sub-MOA accuracy performance and combat condition reliability.

02

Battle Arms Development, Inc. is an American owned and operated small business. It was created in 2009 by two firearm enthusiasts and collectors. Specialize in the design, development, and marketing of tools, parts, and accessories of M14/M1A/M1 Garand and AR/M16/M4 style weapon systems. The BAD-ASS selector is the best known modular AR platform ambidextrous safety selector on the market. It has a modular design that allows you to choose among several provided selector lever types to pick one that best suits your needs and comfort.

Battlecomp® are among the best rifle muzzle devices available in today's market and certainly one of the most well-known and popular muzzle devices. Whereas muzzle brake compensators control rifle recoil extremely well, it is achieved at the expense of reduced flash reduction and very highly concussive shock wave around the muzzle device versus normal flash hiders. Although you can accomplish rapid but accurate multiple shots onto your target with a muzzle brake, the enhanced flash signature and concussion can make a muzzle brake detrimental for lowlight/night combat shooting as well as close proximity shooting with teammates and in confined spaces. The BattleComp® blends the functions of both muzzle brakes and flash hiders by providing the best balance of recoil reduction with only a slight compromise in flash reduction and concussion to create the best battle ready rifle compensator on the market.

Centurion Arms is founded and owned by Monty LeClair, a recently retired decorated combat veteran with 20 years of active duty special operations service as a Navy SEAL. For the past four years prior to his retirement, Monty was the Chief Petty Officer at the famed Navy SEAL Sniper School. During his service, Monty served in several SEAL teams on both the East and West Coasts. Monty also served in NAVSPECWARCOM performing weapons and equipment OT&E (Operational Testing and Evaluation) where he played a significant role as a subject matter expert in the Mk16/Mk17 SCAR development program. He had also performed a stint in TRADET (Training Detachment) as an advanced sniper instructor during which time he famously built one of fellow SEAL sniper Chris Kyle (of American Sniper fame)'s operationally used favorite custom Mk13 sniper rifle. Initially known for custom gun builds and for offering superior quality precision AR barrels, Centurion Arms makes a full range of some of the most innovative and sought after AR rails and AR accessories on the market.

What began as an enthusiast's hobby has grown into a vibrant firearm accessories operation. Production, Sales and Support teams at ERGO have demonstrated what is possible when a passionate group dedicates itself to a common goal. Unified in the company's mission—to provide all shooters with the finest firearm accessories available—the business has continued to grow due to a combination of precision manufacturing excellence and superior customer service. Based in New Mexico, ERGO develops and manufactures high performance small arms accessories to support civilian, law enforcement and military users. From innovative products like the ERGO Grip® and F93 Pro Stock™, Ergo Grips has expanded their product line to include a wide range of precision engineered weapon accessories.

Fortis's focus is to provide "Operator" needed strength with exceptional design and aesthetics at an affordable price. Every product designed by FMI™ undergoes a strenuous testing and evaluation period with a diverse group of select professionals, resolving all issues before a product is considered ready for production. It is this philosophy that ensures each product will meet or exceed the heavy demands of the professionals who use them.

**GoGun USA**

GoGun® USA designs and manufactures an array of components for custom firearms for both the tactical and competitive shooter. Their pioneering and innovative Gas Pedal grip has altered the way handguns are facilitated. The SuperComp™ Talon Brake and SuperComp™ No Talon Brake are considered some of the best rifle muzzle brakes on the market.

Griffin Armament was founded by a pair of sniper-qualified U.S. Army combat infantry veterans. After leaving the military and armed with the insights from their time served in the military and having considerable technical knowledge, they started Griffin Armament to engineer and produce products optimized to meet the needs of today's combat shooters. Today, Griffin Armament designs and manufactures a variety of specialized and highly effective muzzle devices and rifle sound suppressors for a wide range of end-user needs. PTS® is proud to be the exclusive licensee for replica airsoft accessories based on Griffin Armament's products.

The mission at Kinetic™ Development Group is to design and manufacture innovative small-arms accessories and complete systems utilizing the latest materials and fabrication technologies. Kinetic™ products set the bar for quality craftsmanship, reliability, relevance and performance. Kinetic™ started by focusing on what they saw as deficits with the quality rifles and carbines on the market, at least those perceived by the serious end user and warfighter. The first projects were to increase the capability and add user-friendly modularity to the FN SCAR 16s and 17s, with the MREX, or Modular Receiver Extension, which transforms the SCAR from an awkward carbine to a comfortable open architecture carbine configurable with any number of accessories.

Mega Arms is a part of Mega Machine Shop which was established in 1984. For many years their primary clientele were from the aerospace, fabrication and heavy-equipment industries due to their precision machining capabilities and reputation for superior quality. Seeing a void in the firearms industry for guns they knew they were uniquely capable of manufacturing, Mega Arms was formed and are, to this day, best known for their design, engineering, and production of precision AR-15 components and distinctive complete rifles that remain unsurpassed in finish and performance quality in the rifle production industry.

**RAINIER ARMS**

**Rainier Arms®** was started by shooting enthusiasts for shooting enthusiasts. Specializing in high end AR-15s/M16s, parts & accessories, their motto was: "If we won't use it, we won't sell it." Founded in 2005, Rainier Arms® was established (and continues to this day) as a firearms and parts supplier. As time passed, they had a desire for products made a certain way and knew that the only way to make that possible was to make those products themselves. And as evidenced by the popularity of their own products they're off to a good start.

"Innovative, Adaptive, Decisive." Unity Tactical designs and provides innovative products that blend form, function, utility, and technological sophistication into cutting edge solutions to common problems. Their line of highly unique and modular products include the innovative ATOM™ Modular Glock slide, the FUSION™ modular accessory mounting system, and the KNUCKL™ modular helmet mounting system.

US PALM® is dedicated to developing and producing the world's finest firearms enhancements and accessories. One of the things that make US PALM® different is that they are constantly working to refine their product lines. While many of their designs are revolutionary, they believe in maintaining an evolutionary product design mind-set. By staying informed through their cadre of industry professionals - including military and police active duty personnel, firearms instructors, manufacturing experts, and technical advisors - they amass the collective wisdom of many to bring new products, or product refinements, that answer the questions and needs of front line war-fighters.

## EP SERIES

The EP Series products are products purely conceptualized, designed, and engineered in-house by the PTS® team. We begin with examining a need in the marketplace that our product line does not yet fulfill or that we feel that we can improve on. Throughout the design and engineering process, we consult with airsoft and tactical industry experts and experienced shooters to ensure that the product to not just look distinctive and unique, but also to ensure that the product is practically and ergonomically usable for the end user, including both airsoft enthusiasts and sometimes actual shooters. The product is thoroughly reviewed by all involved during its design evolution process before signing it off for production. EP series products are manufactured and finished to stringent quality standards. EP polymer products are made using Dupont Zytel® polymer, a material that far exceeds the standard material commonly used in the airsoft industry and, in some cases, real firearms accessories, to ensure maximum product durability, long service life, exceptional resilience, and the greatest value to the end user.

### PTS® ENHANCED POLYMER MAGAZINE™ [EPM™]

**Dot matrix texture**  
allowing users to mark  
the magazine for  
identification.

The PTS® Enhanced Polymer Magazine™, or EPM™ for short, is a new type of Polymer Magazine for airsoft rifles. The EPM™ is a truly unique magazine, inside and out. Externally it features a polymer shell, with recessed panels for better grip and unique magazine well guides that reduce snagging when the magazine is drawn from and reinserted into pouches. The front of the baseplate features a dot matrix which allows the user to mark the magazine with alphanumeric characters or pictograms for identification.

**Recessed Panels**  
for maximum  
grip and reduced  
snagging from unique  
magazine well guides.

	TPU Rubber

**Recessed dot matrix** to be marked  
accordingly if need be.

## PTS® ENHANCED POLYMER FOREGRIP™ [EPF™]

Storage Compartment for general storage of tools, spare parts etc.

Storage Compartment is also designed to fit a commonly available LiPo battery to power gun discreetly without exposure of wires.

## Color

The PTS® Enhanced Polymer Foregrip™, or EPF™ for short, is a simple yet highly functional polymer foregrip for any gun needing additional front end support.

The EPF™ has a carefully conceived streamlined ergonomic design. The resulting EPF is not only stylish but also extremely comfortable to use. The standard length EPF™ has a storage compartment with a sliding access plate at the base, and pass through channels at the top for wiring. This allows the EPF to store certain airsoft appropriate lithium polymer batteries for front wired electric airsoft guns (thereby removing the need for a battery box) or to store other miscellaneous items and tools.

## PTS® ENHANCED POLYMER GRIP™ [EPG™]

**Storage Compartment** for general storage of CR123 batteries, tools, spare parts etc.

Base Cap is only available with the EPG **GBB** variant.

**Aggressive 360 texturing** for increased surface traction but strategically panelled with comfort in mind

## System

**Improved Ergonomics** with a standard M4 grip angle

KG	82g (approx.)
	76 x 32 x 108mm (approx.)
	DuPont™ Zytel® High Performance Reinforced Polymer

The PTS® Enhanced Polymer Grip™ (EPG™) is a simple yet highly functional polymer pistol grip for the M4/M16 platform. It features an ergonomically designed shape and is a fully ambidextrous design at a conventional grip angle. The beavertail extension naturally encourages a high hand hold under the receiver for maximum recoil control while maintaining comfort. The EPG™'s distinctive texturing is optimized for strong and suitable grip under even adverse conditions.

## PTS® ENHANCED POLYMER FOREGRIP - SHORT™ [EPF-S™]

The PTS® Enhanced Polymer Foregrip - Short™, or EPF-S™, is a simple yet highly functional short polymer foregrip for any gun needing additional front end support.

The EPF-S™ has a carefully conceived streamlined ergonomic design. The resulting EPF-S™ is not only stylish but also extremely comfortable to use. The EPF-S™ has a storage compartment with a sliding access plate at the base to store miscellaneous items and tools.

## Color

**Aggressive 360° texturing** for increased surface traction but strategically panelled with comfort in mind

## PTS® ENHANCED POLYMER GRIP - COMPACT™ [EPG-C™]

The PTS® Enhanced Polymer Grip - Compact™ (EPG-C™) is a simple yet highly functional polymer pistol grip for the M4/M16 platform. It features an ergonomically designed shape and distinctive texturing that is optimized for strong and suitable grip under even adverse conditions. Additionally, the EPG-C™ has a reduced grip angle versus a standard M4 grip that's more compatible with modern carbine gunfighting and CQB stances. This grip angle helps to reduce strain on the wrist and helps to put the hand more in-line with the trigger for better trigger control. It allows equal comfort for shooters who wish to run their guns with their stocks fully collapsed or fully extended.

## System

**Improved Ergonomics** with a more vertical compact angle

KG	78g (approx.)
	53 x 32 x 112mm (approx.)
	DuPont™ Zytel® High Performance Reinforced Polymer

**Aggressive 360 texturing** for increased surface traction but strategically panelled with comfort in mind

## PTS® ENHANCED POLYMER STOCK™ [EPS™]

COMING  
SOON

### Compatible

with mil-spec and most airsoft buffer tubes as well as both AEGs and GBBRs

Ample storage compartment with 139 x 31mm of spacing.

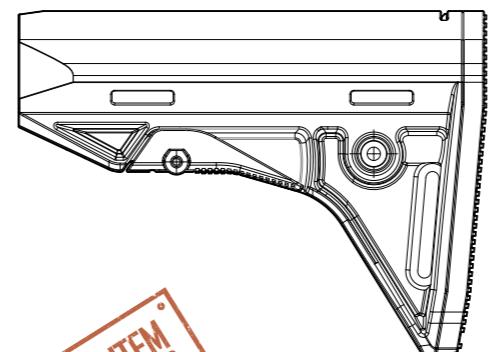

The PTS® Enhanced Polymer Stock™, or EPS™ for short, is a simple yet highly functional collapsible polymer stock for the AR-15 platform. The EPS™ M4 stock has a uniquely comfortable cheek weld, storage tubes on either side that allows for ample storage space for AA, AAA or CR123 batteries and a rear compartment for tools or airsoft batteries for electric airsoft guns.

## PTS® ENHANCED POLYMER RAIL SECTIONS™ [ERS™]

Color

The PTS® Polymer Rail Sections™ (ERS™) are lightweight low profile 1913 rail sections. The double chamfered ends reduces snagging and is comfortable to index against. Available in 4 different lengths: 5, 7, 9 and 11 slots.

	50g (approx.w/ packaging)
	150 x 70 x 12mm approx.
	DuPont™ Zytel® High Performance Reinforced Polymer

17

## PTS® ENHANCED RAIL SECTIONS™ [ERS™] - KEYMOD

Color

The PTS® Enhanced Polymer Rail Sections™ (ERS™) - Keymod are lightweight low profile 1913 rail sections. The double chamfered ends reduces snagging and is comfortable to index against. Available in 5 different lengths: 4,5,7,9 and 11 slots.

	50g (approx.w/ packaging)
	150 x 70 x 12mm approx.
	DuPont™ Zytel® High Performance Reinforced Polymer

## PTS® ENHANCED RAIL SECTIONS™ [ERS™] - M-LOK

Color

The PTS® Enhanced Polymer Rail Sections™ (ERS™) - M-Lok are lightweight low profile 1913 rail sections. The double chamfered ends reduces snagging and is comfortable to index against. Available in 5 different lengths: 4, 5, 7, 9 and 11 slots.

	50g (approx.w/ packaging)
	150 x 70 x 12mm approx.
	DuPont™ Zytel® High Performance Reinforced Polymer

Has built-in sights.

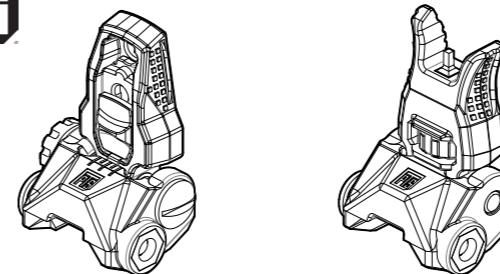

Grants the gun **greater portability**.

The front overextension allows other attachments to compliment the handle.

	82g (approx.w/ packaging)
	198 x 525 x 23mm approx.
	DuPont™ Zytel® High Performance Reinforced Polymer

The PTS® Polymer Carry Handle - Compact™ (PCH-C™) is a great attachment to any small compact gun, especially with guns like the PTS® FPG™ and the PTS® PDR-C/D™. The handle not only provides great portability for the gun, it also has built-in sights for quicker target acquisition. The overextended top on the PCH-C™ adds distance between the front and rear sights for better aiming accuracy. In addition, the front overextension allows other attachments, such as a weaponlight, to complement the handle. The product is made out of very lightweight high strength polymer thus justifying its great portability. It can be easily installed and detached by simply lifting the two hooks and sliding it off or onto the receiver rail.

## PTS® POLYMER CARRY HANDLE - COMPACT™ [PCH-C™]

The PTS® Enhanced Polymer BUIS™ (Back Up Iron Sight) is designed to be low profile, snag-free, and unobtrusive when collapsed. The rear sight includes elevation and windage adjustments as well as dual apertures for close and precise long distance shooting and the front sight adjusts for elevation.

	25g (Front) / 18g (Rear)
	TBA
	DuPont™ Zytel® High Performance Reinforced Polymer

## PTS® ENHANCED SLING PLATE - MODULAR™ [ESP-M™]

The PTS® ESP-M™ is designed for carbine style buffer tubes for the airsoft AR-15/M4 and 308 GBBR platform. This uniquely designed QD End Plate will accept either a milspec QD Sling Swivel (not included) or the included Single Point Sling Swivel to give the user a truly versatile sling mountable receiver end plate. The limited rotation Single Point Sling Quick Attachment Swivel locks in place with a screw and features a hardened steel alloy loop allowing connection to many popular single point sling attachments.

	45g (approx. w/ packaging)
	54 x 37 x 16mm
	Steel Alloy

## PTS® US PALM® AK30 MAGAZINE

The US PALM® AK30 Airsoft Magazine is designed to be utilized by an operator in any condition. The aggressive ridges on the front and rear allow a positive purchase when seating the AK30 into the rifle. The deep waffle pattern on the magazine sides assist in rapid extraction from magazine pouches, and 100% positive manipulation within conditions beyond extreme. Every surface of the AK30 was given careful consideration to benefit the operator working in the harshest conditions on earth.

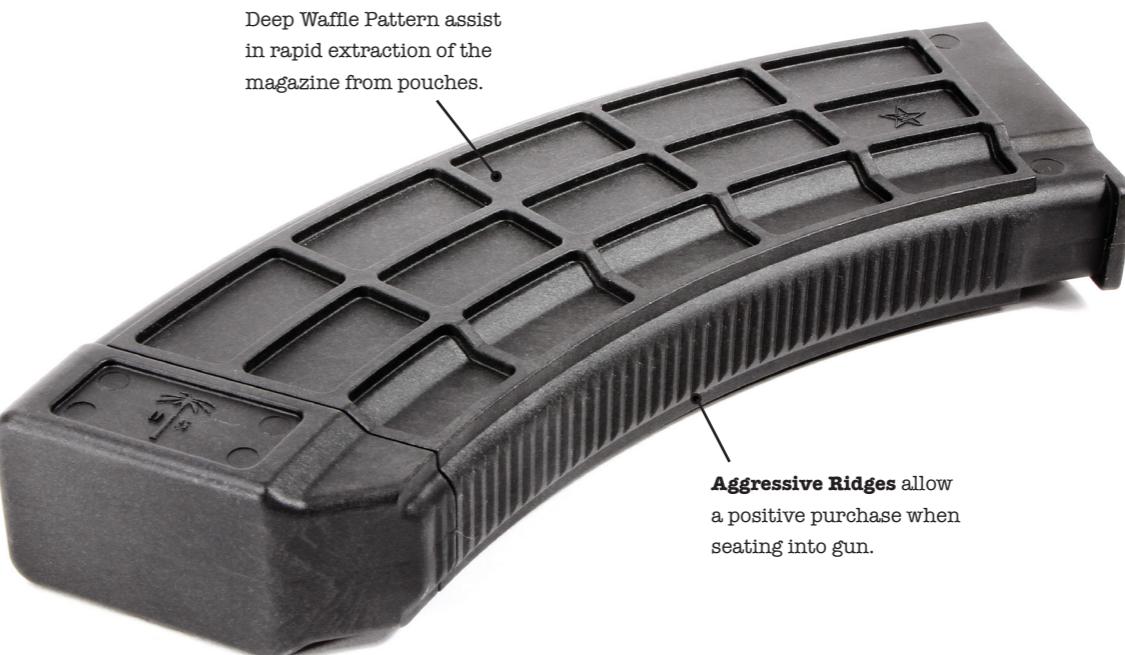

The PTS® US PALM® AK30 Airsoft Magazine is virtually identical in appearance and feel with the real AK30 magazine. Like its real counterpart, the PTS® AK30 magazine is precisely engineered and produced using reinforced polymer. It has a 150 round bb capacity.

allows for ergonomic flexibility.

**Minimalist design**

composing of a one billet design and a skeletonized structure for lighter weight.

The PTS® Fortis SHIFT™ Vertical Grip is a one piece billet design made from 6000 series aluminum. The skeletonized design makes this grip one of the lightest grips on the market. Even with its unique angled skeletonized design, the PTS® Fortis Vertical Grip still maintains the same length as any traditional vertical grip and its angled design as well as the finger notch allows for ergonomic flexibility. The vertical grip can be simply installed using a clamp that is adjusted by only two bolts. This means the user doesn't need to remove other accessories in order to install the grip, allowing you to save time.

## PTS® CENTURION ARMS C4 RAIL

The PTS® Centurion Arms C4 Rail System is a 2 piece free float rail that, when installed, gives the AR rifle a continuous 12 o'clock rail. Features include light weight, integrated QD mount points, a design feature that prevents the rail from loosening or rotating under prolonged stress, and a very simple installation process using the standard rifle barrel nut. Several lengths are available.

**Features:**

- Integrated QD Mount Points.
- Ability to simply install onto a standard barrel nut.
- Free float rail system.
- Includes a Low Profile Gas Block and Mock Gas Tube.

## C4 RAIL 7"

	200g (approx.)
	185 x 62 x 54mm
	Aluminum Alloy

## PTS® CENTURION ARMS CMR RAIL

The PTS® Centurion Arms CMR Rail is a lightweight, rugged, one piece free float handguard that uses a proprietary barrel nut (included). The CMR gives an AR rifle a continuous 12 o'clock rail for accessory mounting but does away with the inclusion of rails at the 3, 6, and 9 o'clock positions to maintain light weight and a narrow, ergonomic profile. An optional proprietary CMR accessory pack is available for mounting components in those positions that include accessory rails, CMR panels, and handstops. Additionally, the CMR has 4 built in anti-rotation QD sling swivel mounting points.

**Features:**

- Package includes a Low Profile Gas Block and Mock Gas Tube.
- Features 4 built-in QD Sling sockets.
- Free Float System.
- Steel Alloy thread inserts for enhanced thread durability.
- CMR specific accessories not included.

## CMR RAIL 9.5"

	300g (approx.)

	300g (approx.)
	280 x 45 x 57mm
	Aluminum Alloy

## CMR RAIL 12.5"

	300g (approx.)
	320 x 40 x 56mm
	Aluminum Alloy

## PTS® CENTURION ARMS CMR RAIL ACCESSORY PACK

The PTS® Centurion Arms CMR accessories are made of DuPont™ Zytel® High Performance Reinforced Polymer. Their light weight and small profile helps to maintain a lightweight platform with minimal bulkiness added to the slender CMR rail's cross section. The polymer accessories adhere to the K.I.S.S. (Keep It Simple Stupid) principle and directly mount to the PTS® CMR with threaded fasteners making them easy to install and modify to customize your rifle for your shooting needs.

**Package includes:**

- 3-Slots Rail Section x2
- 7-Slots Rail Section x2
- Rail Cover x6
- Hand Stop x1

## PTS® ERGO M4 4 RAIL HANDGUARD

The ERGO M4 4 Rail is designed for AR/M4 Training Weapons/Airsoft with a standard A1/A2 Front Sight Base. Allow for attachment of Picatinny rail mounted accessories, forward of the front sight base. Provides extended hand hold opportunities for shooters. Install onto A1/A2 front sight base, locking inside the front sight. If you are installing our M4 4 Rail on a new build, modification may be needed on the front sight base of various brands.

<b>KG</b>	231g (approx.)
<b>mm</b>	61 x 138 x 50mm
<b>Material</b>	Aluminum Alloy

## PTS® ERGO Z RAIL

Installation of the PTS® ERGO Z Rail was quick, easy, and the only tool required was an allen wrench. The two piece drop-in system attached in the same manner as the standard handguards do with the addition of four bolts (two on each side). Although this is not a free-float system, it is a good option for those who are budget conscious and it is also a good option for those who are assigned an M4 for their duties and may not be allowed to alter their assigned training tool. This handguard is in Carbine AR/M4 length and will not replace mid-length handguards.

<b>KG</b>	280g (approx.)
<b>mm</b>	168 x 48 x 61mm (approx.)
<b>Material</b>	Aluminum Alloy

## PTS® ERGO Z FLOAT RAIL

Installation of the PTS® ERGO Z Free Float Handguard is engineered to improve the mission-critical performance of carbine length AR-15/M4 airsoft systems. Ideal for shooters who prefer a thin profile, lightweight, more permanent installation, this precision crafted mounting platform features. It has a unique 2-piece design that it can be installed without taking the Airsoft/Training Weapons' barrel off. This handguard is great for those AR-15/M4 Type owners that don't own any gunsmith tool and those that have an airsoft AR-15/M4 with permanently attached muzzle device.

<b>KG</b>	320g (approx.)
<b>mm</b>	183 x 48 x 62mm (approx.)
<b>Material</b>	Aluminum Alloy

## PTS® ERGO 7 & 18 SLOTS LOWPRO RAIL COVER

The PTS® Ergo 7 & 18 Slots Lowpro Rail Cover can add gripping surface with your rail cover and help protect rails in un-mounted areas. ERGO's rail cover also protects the operator from being cut by uncovered rails and prevents gear from hanging-up. Clip directly onto rail configurations on handguards covers 7 & 18 slots. Rail Covers are made of Polymer.

<b>KG</b>	50g (approx. w/ packaging)
<b>mm</b>	163 x 48 x 62mm (approx.)
<b>Material</b>	Reinforced Polymer

## PTS® FORTIS REV™ FREE FLOAT RAIL SYSTEM

PTS® Fortis REV™ is an extremely lightweight yet robust free floating rail system. The REV™'s unique design reduces as much weight as possible while maintaining strength by utilizing a 1 piece body design. KeyMod mounting points are located at the 3 & 9 O'clock positions for modularity and additional weight savings. It's unique mounting system captures a standard airsoft AR-15/M4 barrel nut for easy installation.

## FREE FLOAT RAIL SYSTEM 9"

## Features:

- All rails include a replica Fortis Low Profile Gas Block and Mock Gas Tube.
- Rotation limited QD Sockets and anti-Rotation Tabs.
- Contiguous Milspec 1913 Top Rail and Milspec 1913 rail sections at the front of the rail.

## PTS® KINETIC™ MREX™-AR

NEW ITEM  
2016

The Kinetic™ MREX™-AR for AR style rifles is ergonomically set up and purposely designed to feel and be more like a standard handguard rather than a tube. The profile provides the user a very comfortable C-Grip on the rail and allows accessories to be mounted seemlessly as if they are integral to the rail. The flat bottom of the rail is ideal for stably shooting off supports. The MREX™-AR includes QD Sling Swivel mount points and has M-LOK accessory compatible slots.

## PTS® KINETIC™ SCAR MREX™

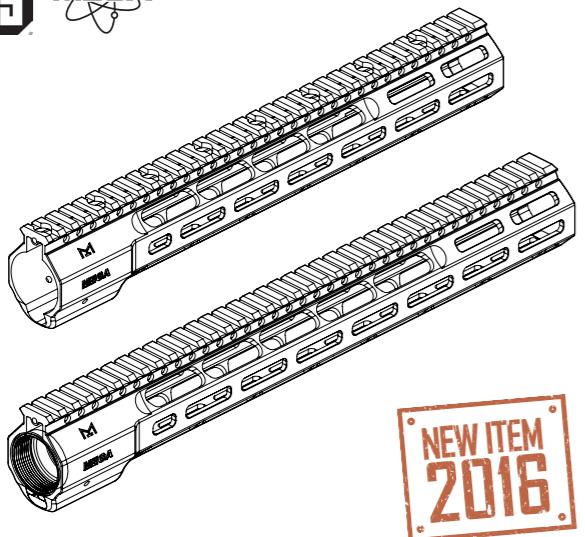

NEW ITEM  
2016

The Kinetic™ SCAR MREX™ (Modular Receiver Extension) for Tokyo Marui and VFC SCAR rifles is designed to be simple, durable and lightweight. To achieve this, a high strength one piece design is used for maintaining maximum durability and boasts a lower profile than the factory platform. The slender MREX™ better accommodates the modern "support hand forward" rifle hold and has M-LOK accessory compatible slots.

	Aluminum Alloy

## PTS® MEGA ARMS WEDGE LOCK HANDGUARD 12" &amp; 14"

NEW ITEM  
2016

The Mega Arms "Wedge Lock" Handguard is given its name due to an extremely tight but very simple rifle mounting system design. The system consists of two wedge-shaped planes, both at complementary angles that push against each other by simply tightening a screw thus creating tension between the handguard and the barrel nut. It also features an anti-rotation pin that indexes the handguard to the upper receiver, preventing it from any rotational movement around the barrel nut. The Wedge Lock is fully compatible with M-LOK accessories and mounting systems.

## PTS® BATTLECOMP® 1.0 FLASH HIDER

PTS® BattleComp® 1.0 is an accurate reproduction of the original and still most popular BattleComp® 1.0. The PTS® airsoft replica is available in clockwise and counterclockwise 14mm threading.

50g (approx.)	Steel Alloy
44 x 220 mm	Clockwise & Counter Clockwise

## PTS® BATTLECOMP® 51.0 FLASH HIDER

The PTS® BattleComp® 51.0 is the latest release and is designed to integrate with AAC 51T-compatible silencers. The PTS® airsoft replica is available in clockwise and counterclockwise 14mm threading and is compatible with the PTS® AAC M4-2000 replica mock silencers and the PTS® MK18 Mock Silencers.

80g (approx.)	Steel Alloy
63 x 290 mm	Clockwise & Counter Clockwise

## PTS® BATTLECOMP® 1.5 FLASH HIDER

PTS® BattleComp® 1.5 was designed to have the same capabilities as its BattleComp® 1.0 counterpart, however it is an elongated version of the 1.0 variant that when installed on 14.5" barrels extends the overall length to 16.1". The PTS® BattleComp® 1.5 is an accurate reproduction of the BattleComp® 1.5 and is available in clockwise and counter-clockwise 14mm threading.

110g (approx.)	Steel Alloy
55 x 220 mm	Clockwise & Counter Clockwise

## PTS® BATTLECOMP® BABC FLASH HIDER

Based on the same precision construction as the original BattleComp® 1.0, the BABC (Big A\*\* Battle Comp) was designed as a multi-caliber compensator for larger caliber firearms from 6.5 Grendal, 6.8 SPC, 7.62 NATO to .300 Win Mag and AAC Blackout. The PTS® BattleComp® BABC is an accurate reproduction of the BattleComp® BABC and is available in clockwise and counter-clockwise 14mm threading.

113g (approx.)	Steel Alloy
61 x 220 mm	Clockwise & Counter Clockwise

## PTS® BATTLECOMP® 2.0 FLASH HIDER

PTS® BattleComp® 2.0 is a variant of the original BattleComp® whose external dimensions have been modified to match that of the standard A2 bird cage flash hider in order to be compatible with silencers that were designed to fit over A2 flash hiders. The PTS® BattleComp® 2.0 replica is available in clockwise and counter-clockwise 14mm threading.

50g (approx.)	Steel Alloy
44 x 220 mm	Clockwise & Counter Clockwise

## PTS® GOGUN® USA SUPERCOMP™ NO TALON MUZZLE BRAKE

M	Aluminum Alloy
O	Clockwise & Counter Clockwise

## PTS® GoGun® USA SUPERCOMP™ TACTICAL TALON MUZZLE BRAKE

The latest PTS® GoGun® USA SuperComp™ Tactical Talon Muzzle Brake is touted to be their best SuperComp™ to be ever made to date. Keeping its signature patented Talon Tips; which can be used as a breacher or a less lethal persuader; the weight is significantly reduced in comparison to other SuperComp™ muzzle brakes for tactical and competitive applications. The nine axial ports, key features to its unique design and staying true to the real steel, redirects muzzle blast in an extremely effective "Hex Stabilizing Star Pattern (SSP)".

KG	39g (approx.)

D	75 x 250 mm
O	Clockwise & Counter Clockwise

**Aggressive Talon Tips**  
Ideal for use as breacher  
or less lethal persuader.

## PTS® GRIFFIN ARMAMENT M4SD LINEAR COMP

The Griffin Armament M4SD Linear Comp is the only muzzle device from Griffin Armament without any side ports, thus reducing side blast to other people beside the shooter's position. Instead it features three ports on top for muzzle neutrality as well as a de Laval nozzle in front to project linear flow of pressure down range. The Airsoft version has been designed to be compatible with any A2-compatible suppressor mount including the PTS® Griffin Armament M4SD Suppressor.

KG	94g (approx.)
D	57 x 220 mm
M	Aluminum Alloy
O	Clockwise & Counter Clockwise

## PTS® GRIFFIN ARMAMENT M4SD MUZZLE BRAKE

The Griffin Armament M4SD Muzzle Brake is designed purely to maximize recoil control and muzzle movement. It is perfect for rapid shooting situations such as competitions where minimal rifle and sight movement during rapid shooting is important for very fast and accurate follow up shots. The Airsoft version has been designed to be compatible with any A2-compatible suppressor mount including the PTS® Griffin Armament M4SD Suppressor.

	73g (approx.)
	57 x 220 mm
	Aluminum Alloy
	Clockwise & Counter Clockwise

40

## PTS® GRIFFIN ARMAMENT M4SD PALADIN BRAKE

The Griffin Armament M4SD Paladin Brake is a light, compact premium muzzle control device using only a single port brake to provide a controlled, flat shooting performance. The Airsoft version has been designed to be compatible with any A2-compatible suppressor mount including the PTS® Griffin Armament M4SD Suppressor.

	60g (approx.)
	44 x 220 mm
	Aluminum Alloy

## PTS® GRIFFIN ARMAMENT M4SDII FLASH COMPENSATOR

The PTS® Griffin Armament M4SDII Flash Comp is Griffin's flagship product. It combines the distinctive design and functional recoil control ability of the Griffin M4SD Tactical Compensator with increased flash suppression capability via the addition of the 3 pronged tips to provide the optimal balance of recoil control and flash suppression with minimal compromise for both functions. The Airsoft version has been designed to be compatible with any A2-compatible suppressor mount including the PTS® Griffin Armament M4SD Suppressor.

	70g (approx.)
	Steel Alloy

Clockwise & Counter Clockwise

41

## PTS® GRIFFIN ARMAMENT M4SDII FLASH SUPPRESSOR

The PTS® Griffin Armament M4SDII Flash Suppressor is designed to offer superior flash suppression over a standard A2-style flash hider. The Airsoft version has been designed to be compatible with any A2-compatible suppressor mount including the PTS® Griffin Armament M4SDII Suppressor.

	50g (approx.)
	57 x 220 mm

Clockwise & Counter Clockwise

## PTS® GRIFFIN ARMAMENT M4SDII TACTICAL COMPENSATOR

The Griffin Armament M4SDII Comp is a tactical muzzle device designed to both provide superior recoil control for very accurate and controllable rapid shooting while keeping concussion and flash suppression at a manageable level. The Airsoft version has been designed to be compatible with any A2-compatible suppressor mount including the PTS® Griffin Armament M4SD Suppressor.

	70g (approx.)
	44 x 220 mm

Clockwise & Counter Clockwise

## PTS® GRIFFIN ARMAMENT M4SDII MOCK SUPPRESSOR

The M4SD II was designed to provide the optimal combination of lightweight, peak performance, and durability. The PTS M4SD-II Airsoft Mock Suppressor is universally compatible with all four of PTS Griffin Armament's replica muzzle devices: the Griffin Armament Tactical Compensator, Muzzle Brake, Flash Suppressor and Flash Comp.

	200g (approx.)
	115 x 40Ø mm
	Aluminum Alloy

42

## PTS® GRIFFIN ARMAMENT QD BLAST SHIELD

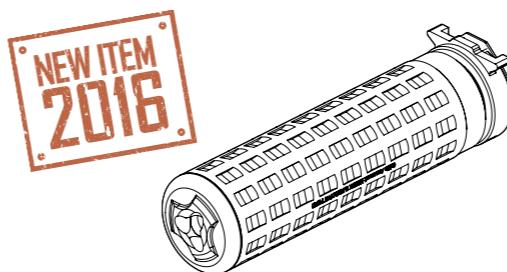

The QD Blast Shield is designed to offer significant concussion reduction for the rifleman and nearby team members in a CQB environment by directing concussive force of rifle gunfire forward instead of to the sides. It is especially effective on short barrel rifles or any rifle with a muzzle brake/compensator device. It is designed with a fluted geometry within the triangular shaped shield that lightens the unit while providing internal front supports for the muzzle device.

	153g (approx.)
	57 x 40 x 38 mm
	Aluminum Alloy

Lightweight unit from the fluted geometry within its triangular shaped shield

## PTS® GRIFFIN ARMAMENT M4SD - K SUPPRESSOR

NEW ITEM  
2016

The new Griffin Arms M4SD-K Suppressor utilizes the existing Griffin QD latch system making it compatible with all existing Griffin muzzle devices. The suppressor body is enhanced by a series of flutes surrounded by supporting structures giving the suppressor body an enhanced strength to weight ratio and an increase in surface area which aids in the cooling of the suppressor.

	TBA
	146 x 38Ø mm
	Aluminum Alloy

43

## PTS® RAINIER ARMS® MINI XTREME TACTICAL AR-15

The Rainier Arms® RMC (Rainier Mini Compensator) was designed as a single port compensator with similar functionality to the Rainier Arms® XTC but in smaller overall dimensions to reduce weight. The PTS® Rainier Arms® RMC is an aesthetically accurate, licensed reproduction of its real firearm counterpart and is available in clockwise and counterclockwise 14mm threading.

	38g (approx.)
	37 x 22Ø mm
	Steel Alloy

Clockwise & Counter Clockwise

## PTS® RAINER ARMS® XTREME TACTICAL AR-15

The Rainier Arms® XTC (Xtreme Tactical Compensator) was designed as a true multifunctional muzzle device that reduced felt recoil and muzzle rise with a relatively low muzzle flash. The PTS® Rainier Arms® XTC is an aesthetically accurate, licensed reproduction of its real firearm counterpart and is available in clockwise and counterclockwise 14mm threading.

	68g (approx.)

## PTS® UNITY TACTICAL ATOM™

## Color

KG	282g (approx. w/ packaging)
	185 x 26 x 42 mm
	Aluminum Alloy

## Compatibility

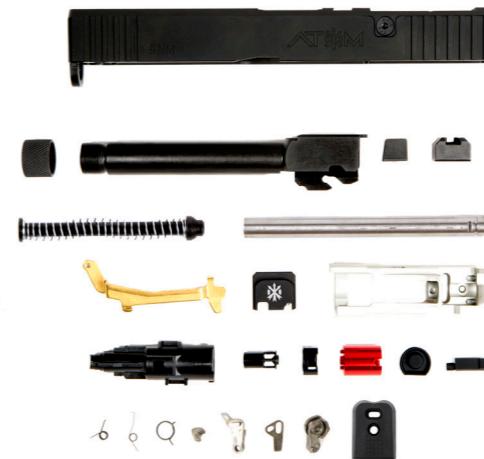

Tokyo Marui G17

The PTS® Unity Tactical ATOM™ is a Tokyo Marui G17 compatible slide kit. The PTS® ATOM™ slide is specifically designed to be able to mount RMR-style micro red dot optics for ultra-fast and accurate target acquisition.

The ATOM™ comes with front slide serrations, integrated front and rear suppressor sights and a red dot adapter dovetail cut. The front slide serrations allow for a better grip on the slide when manipulating it, whether for press-checking, jam clearing, racking to load or unload, or single handed manipulations during less than optimal gripping conditions like when wet, bloody, muddy, etc. The suppressor height iron sights allow you to always maintain an aimed sight picture even when using the pistol with a suppressor or if the red dot malfunctions.

## Package includes:

- Integrated back-up sight BUIS
- Red Dot Adapter
- ATOM™ Slide
- Steel 14mm CW Barrel
- Inner Barrel
- Thread Protector
- Housing for the TM G17
- Nozzle return spring guide
- Reinforced Nozzle Set
- Piston Head
- Reinforced Trigger Bar
- Steel Zero Hammers Set
- Recoil Spring Guide with 120% Spring
- PTS® Enhanced Polymer Shockplate™ - G

## PTS® BATTLECOMP® BCE CUSTOM G-SLIDE

## Compatibility

Tokyo Marui G17

NEW ITEM  
2016

The PTS® BattleComp® BCE Custom G-Slide consists of a minimalistic but very distinctive appearance where the front and rear serrations are specifically designed to mimic the trademark pattern of the incredibly popular BattleComp® muzzle device ports. The slide is compatible with the Tokyo Marui G17.

KG	60g (approx. w/ packaging)

## PTS® MEGA ARMS AR-15 SLIDE LOCK CHARGING HANDLE

**Minimalist design**

with as few moving parts for simple and reliable operation.

KWA / KSC

**Skeletonized levers**

to reduce weight without sacrificing strength

Fully ambidextrous

	39g (approx.)
	181 x 66 x 10 mm
	Aluminum Alloy

## PTS® RAPTOR CHARGING HANDLE

Rapid Palm "Blading" along the levers for maximum grip operation.

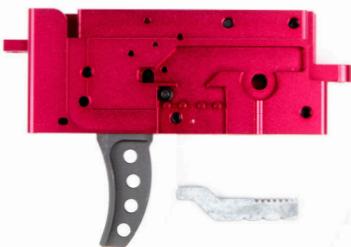

Fully ambidextrous

The Raptor is truly revolutionary in design & function. From rapid palm "blading" or finger thumb charges of the rifle, the motion is fluid & fast from either strong or support side.

Using a unique mechanism developed by AXTS, the charging handle comprehensively provides right or left handed users with ergonomic benefit. Not only does PTS® Raptor Ambidextrous Charging Handle deliver advanced training method, but also significantly improves the manipulation time. The catch lever and pull handles both smoothly operate which brings users with a great sense of security.

## PTS® ENHANCED SYSTEMA PTW GEARBOX

KG	82g (approx.)
mm	90 x 60 x 19mm (approx.)
Material	Aluminum, 100% CNC Processed

The PTS® Enhanced Systema PTW Gearbox is designed to ensure smooth and reliable performance even when placed under high internal stress, while reducing the overall package dimensions. This mechbox is a direct replacement for any M4/M16 Systema PTW (Professional Training Weapon) type platform, and is a high quality upgrade part to the standard PTW Challenge Kits.\*

**Packaging Includes:**

- Content Gearbox Shell
- Enhanced Trigger
- Selector Rack Gear
- Click Ball
- Click Ball Spring
- Click Ball Screw

PTS® BATTLE ARMS DEVELOPMENT INC.  
AMBIDEXTROUS SAFETY SELECTOR SHORT THROW

KG	50g per set (approx.)
mm	27 x 12mm max size of lever
Material	Steel

Color

The PTS® BAD-ASS - Short Throw has a shorter rotational distance thus allowing for lightning fast manipulation of the safety. You just need to flick it half the distance to change fire control setting. This allows for more lever clearance, reduces the need to adjust your firing grip when manipulating the safety, and reduces lever interference to the trigger finger knuckle.

**GBB package Includes:**

- 5 x Modular Selector Levers
- 2 x Torx Screws (1 x M3x6, 1 x M3x4)
- 1 x GBB Selector Shaft
- 1 x Safety Detent & Selector Detent Spring

**Variants:**

- Semi Auto - 0 ~ 45°
- Full Auto - 0 ~ 45° (semi auto) ~ 90°

- 1 x Forward Rail - Inline
- 1 x HUB (Rail Mount)
- 1 x Offset Wing Mount
- 1 x 1" Light Ring Mount
- 1 x Offset Rail - Short
- 1 x HUB Extension

**Color**

	99g (approx.)
	192 x 109 x 30mm (w/packaging)
	Aluminum Alloy

The PTS® Unity Tactical FUSION™ series is a modular, multi-purpose mount designed to give the end user extreme flexibility in mounting options. It was engineered from the ground up to provide a strong mounting base with the widest range of configurations while remaining lightweight and inexpensive.

The system consists of a base with several accessories adapters. The current offerings encompass a wide range of current devices to include lights, lasers, optics, and ancillary equipment. Because the mounting system is standardized, new accessory mounts could be introduced as equipment requirements and tactics, training, and procedures (TTP's) change, reducing time to market and maximizing effectiveness.

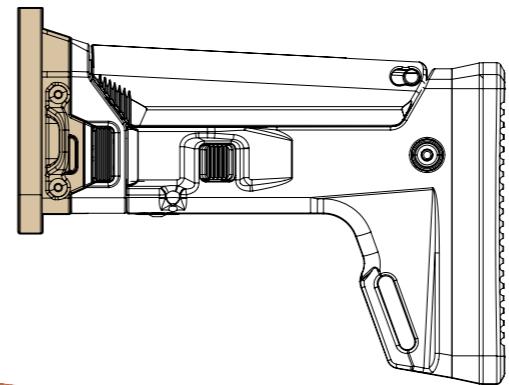

## PTS® KINETIC™ SAS SCAR ADAPTABLE STOCK KIT

KINETIC™  
DEVELOPMENT GROUP

NEW ITEM  
2016

The PTS® Kinetic™ SAS SCAR Adjustable Stock Kit allows the user to attach the original PTS® Masada Adjustable Stock to the Tokyo Marui and VFC SCAR. The PTS® Kinetic™ SAS SCAR Adjustable Stock includes all the adjustability features of the original SCAR stock but is a more aesthetically pleasing replacement with a sturdier and easier to manipulate folding mechanism.

## PTS® PERSONAL DEFENSE RIFLE [PDR-D™]

**COMING SOON****58**

The PTS® PDR™ is a conceptual prototype. The concept is envisioned as an ultra-compact, rifle-caliber personal defence weapon. It is designed to fill the unique role between pistol and rifle, by combining the stealth of the handgun with heavy fire power while greatly reducing any logistical burden. The PDR™ is comprised of two models: the PDR-D™ which is for CQB and Direct Action Missions while the PDR-C™ was designed for those operating in confined spaces, such as armoured vehicles. The PDR-D™ features a full sized pistol grip, removable forward grip and extended tail section.

## PTS® PERFORMANCE ARM SLEEVES

PTS® Performance Arms Sleeves are designed to protect exposed skin from the sun's harmful ultraviolet rays throughout the Anti-UV fabric. Additionally, PTS® Performance Arms Sleeves are tailored to be a comfortable stretch fit, made from lightweight, moisture-wicking fabric.

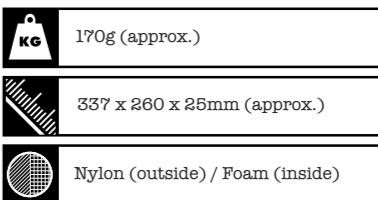

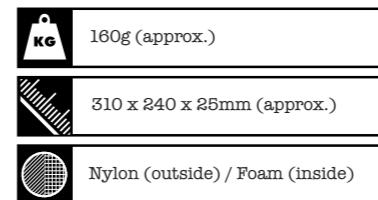

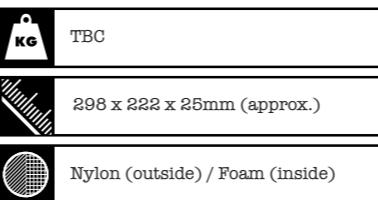

Constructed from premium-grade materials, PTS® Performance Arms Sleeves' high-performance polyester fabric quickly and efficiently wicks sweat away from the body and moves it to the fabric surface, where it evaporates, keeping users dry and comfortable even during the most strenuous conditions. The Anti-UV fabric construction provides a minimum of UPF+30 ultraviolet protections thus preventing sunburn and other sun related illnesses.

## PTS® SAPI DUMMY PLATE

The PTS® SAPI Dummy Plates is an ideal alternative to your heavier and harder standard dummy plate. Designed solely for Airsoft and Milsim purposes, the plate has been carefully constructed to ensure flexibility and lightness - enabling you to perform any actions or manoeuvres with ease and fleet of foot. Perfect for use in Airsoft and Milsim where mobility will play an important role. Intentionally curved in shape, the plate will wrap around the body providing comfort for the user. The materials have been tested to be abrasion resistant and will not lose any color from washing or drying. There is also elasticity in these materials, allowing it to return to its original form from any force applied.
